The compsn. comprises, pts. wt., (a) polyphenylene ether resin 20-80, (b) styrene resin 80-20 and (c) premixed compsn. composed of polyolefin 30-60 and chain-structural copolymer of general formula A-B-(-A-B-)_n 70-40, where A = vinyl aromatic block; B = conjugated diene hydrocarbon block; n = 1-2; and content of A component = 35-50 wt.%.

Polyolefin resin is, e.g. polyethylene, polypropylene, polyisobutylene, ethylene-propylene copolymer or ethylene-organic ester copolymer. A-B-(-A-B-)_n type block copolymer is pref. elastomer having wt. average mol. wt. 50,000-500,000. Polyphenylene ether resin is pref. poly(2,6-dimeth,4-phenylene)ether. Styrenic resin is pref. polystyrene or rubber-modified high impact polystyrene.

USE/ADVANTAGE - The compsn. is useful for moulding parts of industrial or electric device. Through incorporating specified premixed resin compsn., without having declination of substantial superior properties of polyphenylene ether resin, e.g., rigidity, heat resistance, etc., impact resistance and anti-stress cracking properties are remarkably improved.

ABSTRACTED-PUB-NO: JP 63245453A

BASIC-ABSTRACT:

Compsn. comprises compounding 1-20 pts. wt. of a pre-kneaded compsn. consisting of 30-70 pts. wt. of polyolefin type polymer and 70-30 pts. wt. of a resinous block copolymer of general formula, A-B-(A-B)_n, to 100 pts. wt. in total of (a) 20-80 pts. wt. of polyphenylene ether resin and (b) 80-20 pts. wt. of styrene type resin. (A = vinyl aromatic block; B = conjugated diene type hydrocarbon block; n = 1 or 2; and content of component A = 50-65 wt.%).

The polyolefin type polymer is polyethylene, polypropylene, polyisobutylene ethylene-propylene copolymer or ethylene-organic ester copolymer. The A-B-(A-B)_n type block copolymer has wt. average mol. wt. 100,000-500,000. The polyphenylene ether resin is poly(2,6-dimethyl-1,4-p-phenylene) ether. The styrene type resin is polystyrene, esp. rubber modified high impact resistance polystyrene. As A, styrene is pref. used and as B, 1,3-butadiene and isoprene are pref. used.

ADVANTAGE - The resin compsn. has good impact resistance and stress-crack resistance as well as rigidity and heat resistance, etc., of polyphenylene ether resin.
